

# CAPELLA™

Petunia hybrida

Brand NEW 22

CAPELLA™ Hello Yellow

- The perfect petunia – performs well in propagation, the greenhouse AND for the end consumer
- Naturally controlled habit was selected for quart production but will also grow to fill a larger pot
- Blooms early enough for any market
- Mature height and width is 10 inches x 12 inches

#### PROPAGATION TIPS:

- Stick on priority
- Spray Daconil the day of sticking
- Mist to keep turgid and keep soil temp at 72-74F (23C) until roots form then lower to 68F (20C)
- Remove from mist as soon as possible
- B-9 or B-9/Arest tank mix can be effective to control unwanted growth.

#### FINISHING TIPS:

- Day of transplanting: Spray Daconil and water in thoroughly to activate starter charge in soil
- Feed at 100 to 150 ppm N as needed
- Paclobutrazol drench at 2 ppm can be effective to control unwanted growth

| Container Size Schedule<br>@ADT of 68°F | Total weeks<br>from stick to finish |
|---|-------------------------------------|
| Quart                                   | 12 weeks                            |
| Gallon                                  | 12 weeks                            |
| 8" at 1 ppp                             | 12 weeks                            |
| 10" at 3 ppp                            | 12 weeks                            |
