

Our new winter type has “never before” resistance!

Selector RZ is the first ever winter type with High Resistance to Powdery Mildew. It is also High Resistant to CGMMV. The fruits have a great shape and are mainly in the medium grading. All of this without being sensitive to low light necrosis.

Selector RZ

Long English Cucumber

- High resistance level against powdery mildew
- High resistance level against CGMMV
- No low light necrosis
- Well filled medium length fruits
- Planting period October through January

Bon DEFENSE
